ABOUT ME

Certified Product Owner, Scrum Master and a GenAI advocate with a strong record of delivering high-impact digital solutions and driving customer-centric value. Experienced in defining product vision, managing roadmaps, and prioritizing backlogs to align business goals with user needs. Skilled in stakeholder collaboration, data-driven decisions, and fostering empowered, self-organizing teams that embrace innovation and continuous improvement.

Lead Consultant | 2024 - Current | Capgemini- Aarhus, Denmark

Driving Agile product initiatives to enhance organizational agility, efficiency, and innovation. Overseeing the AI for Workplace product line as part of a Nordic-wide initiative, defining vision and roadmap to accelerate enterprise AI adoption and productivity transformation, resulting in faster deployment of AI solutions and measurable improvements in employee productivity.

- A Nordic initiative to develop advanced AI expertise through structured learning, hands-on training and client projects. We build and run solutions using machine learning, large language models and high-code/low-code software.
- I lead the AI for Workplace assembly line, delivering AI solutions to Capgemini clients across Nordics. As the lead, my responsibilities include- Strategic Planning, Team Leadership, Innovation, Collaboration, Reporting and staffing.
- Leading a high-visibility initiative to train executives and other internal departments on Artificial Intelligence and Microsoft Copilot.
- Facilitated the project funnel and opportunity pipeline for the AI Accelerator program, enabling optimal resource allocation and driving engagement in billable projects.
- Conceptualized and defined the AI-driven product vision as Product Owner, identifying key features such as voice/text chat, knowledge ingestion, and report generation, and prioritizing backlog items based on stakeholder needs.
- Oversaw development and delivery of the functional prototype, collaborating with cross-functional teams, guiding implementation, and presenting the solution to stakeholders and leadership as part of a rapid innovation cycle.
- Engage with teams across domains to identify opportunities where AI can enhance processes, products, and technology solutions.
- Collaborate with leadership and cross-functional teams to prioritize, plan, and implement AI-driven initiatives, ensuring alignment with business goals and measurable outcomes.

Scrum Master | 2023 – 2024 | Altimetrik (Novartis)- Remote, Denmark

Scrum Master for a Data analytics team which is responsible for working on given use cases and forming a centralized data lake.

- Developed and monitored Agile processes, such as sprint planning, daily stand-ups, sprint reviews, and sprint retrospectives, to ensure the successful completion of project.
- Successfully coached and mentored the development team to maximize their self-organization, innovation and delivery.
- Formed a DevOps model in the team to ensure defects have been acknowledged and Business is not affected.
- Jira admin for multiple use cases and Integrated EazyBi reports to maintain the transparency among Business and IT.
- Defined a Definition of Done (DoD) to ensure stories are fully completed (Dev, Test, Release and Documentation) before marking them as Done.
- Regular connection with the team members to encourage feedback culture in the team and resolve conflicts if any.
- Leading change management process for software production release and responsible for each phase of SDLC.
- Regular connect with the Business and Product Owner to understand upcoming major requirement to create a roadmap and do the capacity planning with the team accordingly.
- Encouraged cross functional internal training program in the team and make sure team is capable enough to help and backfill each other.
- Stakeholders' management, People management and involve in other SAFe environment activities with other Scrum Masters.

Integration Architect | 2022 – 2023 | Siemens Gamesa Renewable Energy- Vejle, Denmark

By following CMD processes, working towards the Idea to Offering principle within Design Cluster. Keeping Business and IT at the same platform and managing the budget for multiple projects to achieve the goal of 1 organization - 1 process. Primary responsibilities were-

- Forecast and manage the budget for all the offshore technologies.
- Demand Management and Project Management
- Involvement in IT demands in all the phases.
- Performing a key role to bridge the gap between Business and IT for their demands.
- Release Roadmap and Discovery Workshop.
- Process improvement and Stakeholders Management.

Key contribution:

- Product Roadmap creation.
- Facilitation of Cluster meetings and stakeholder management.
- Provide the status of surplus budget, balanced budget and deficit budget to the Business teams.
- Demand creation and be involved with the stakeholders and responsible teams on each phase.
- Actively participated in Discovery workshops.
- Managed multiple vendors and aligned with them on a weekly/monthly basis.

Cloud Intake Manager | Product Owner | 2020 – 2021 | Legato Health Technologies- Bangalore, India

Played a key role in the organization's Agile transition by implementing SAFe practices, leading PI and Iteration Planning, and driving Scrum adoption. Collaborated with cross-functional teams to accelerate Cloud Adoption and migrate legacy platforms (Physical servers, Hyper-V, AWS, and VMWare) to AWS IaaS, PaaS, and SaaS.

- Defined and maintained product vision, roadmap, and backlog aligned with business goals.
- Partnered with business, sales, and IT stakeholders to translate needs into product features.
- Prioritized and refined backlog items; established and reviewed user story acceptance criteria.
- Worked with Cloud Operations and Architecture teams to align releases with strategic objectives.
- Supported impediment resolution and ensured consistent delivery progress.
- Contributed to global AWS template standardization and cloud governance practices.
- Fostered collaboration between Cloud, DevOps, and Agile teams to drive efficiency and innovation.

DevOps Lead | 2016 – 2020 | at Wells Fargo- Bangalore, India

Experience working in multiple roles in the organization with good understanding of business requirements elicitation, analysis and quality assurance and experience in envisioning, representing, and translating the product vision from the business area to software development and operations. Experience in software development, system administration and operations allowed me to bridge the gap between development and operation for an efficient work model.

- Organized and facilitated Iteration planning, daily stand-ups, reviews, retrospectives, release planning and demos by following SAFe practices.
- Tracked and effectively communicated team velocity and sprint/release progress to the stakeholders in an Agile approach.
- Stakeholder management.
- Provided all support to the team using a servant leadership style to remove impediments by understanding the control and release processes.
- Change management, Problem management and Incident management.
- Migration of applications to NexGen CI-CD platform according to the type of application
- Implemented CI/CD process for various applications.
- Working knowledge in deploying CI/CD systems using Azure DevOps.

Build and Release Engineer | 2016 – 2020 | at WIPRO- Bangalore, India

- Monthly and quarterly releases.
- Supported Emergency change requests and Problem tickets.
- Integrating Artifactory and uDeploy.
- Build a pipeline using Jenkins.
- Repository migration.
- Created standardized templates for build and deploy process.
- Coordinated among development teams for the monthly and quarterly releases.
- Provided support for Emergency change request and Problem tickets for Java, .NET application deployment on a 24/7 basis.
- Create and customize Jenkins file according to the requirement. Created standardized template in IBM-UrbanCode deploy to support deployments in various environments.
